International Maritime Organization Class No. 8
UN No. UN3264

Commodity Name Pro-Shine

Characteristics of Cargo Red liquid with an acrid odor

Nature of Hazard Corrosive to skin and eyes; causes severe damage if inhaled or ingested; attacks metals and liberates flammable hydrogen gas

Protective Devices Don protective gear before entering the hazard zone. Wear goggles that give complete eye protection, rubber gloves and impervious rainwear to protect skin, and respirators with acid gas cartridges for respiratory protection.

Emergency Action Avoid Direct Contact with product. Stop leaks only if it involves no personal risk. Prevent acid from entering watercourses or sewers, or dike the liquid with sand or earth to prevent the spread of liquid. In case liquid has entered a watercourse or sewer, inform police or fire department HAZMAT personnel.

Emergency Telephone No. 1-813-248-0585 Chem-Tel International Emergency Response

Spillage Contain liquid to prevent spread, then neutralize acid with lime or soda ash, absorb liquid with inert absorbent such as clay or sand, and recover absorbed material and place in an impervious container. Consign the recovered material to a licensed HAZMAT contractor for disposal.

Fire Do not attempt to deal with any fire involving the load. Small vehicle fires maybe handled with a suitable fire extinguisher.

First Aid For eye contact, immediately wash out with plenty of cool clean water. Get medical attention as soon as first aid has been administered. Remove contaminated clothing and wash exposed skin with plenty of water. Seek medical treatment if exposed to fumes or liquid, since symptoms of hydrofluoric acid exposure may not develop for several hours.
